

# Fun Facts About Fiber

## EAT IT WHOLE!

Food changes when processed and its fiber content may change too! Look at how the amount of fiber changes when whole apples are turned into juice!

1 whole apple, with peel	3.7 grams of fiber
1 whole apple, without peel	2.4 grams of fiber
1/2 cup apple sauce	1.5 grams of fiber
3/4 cup apple juice	0 grams of fiber

## FIBER & FOOD LABELING

Food packages often advertise claims about the nutritional value that food. Use the guidelines below when looking for high-fiber foods.

- “**Good Source**” means at least 3 grams of fiber per serving
- “**Excellent Source**” means at least 5 grams of fiber per serving
- Look for “**whole grain**” or “**whole wheat**” in the beginning of the ingredient list

## 5 TIPS FOR A FRESH START WITH FIBER

1. **Get a Breakfast Boost:** Wake up to a nutritious, high-fiber breakfast cereal (5 or more grams of fiber per serving). You'll meet nearly 15% to 25% of your daily fiber needs.
2. **Become a Topper:** Don't forget the fiber-filled toppers like: bananas (3.1 grams each), blackberries (about 3.8 grams per 1/2 cup), or hummus (2 tablespoons has 1.6 grams) while enjoying cereal, a whole-wheat bagel, or oatmeal.
3. **Enjoy Fruity Snack Attacks:** When you feel the urge for a snack, be sure you have fresh or dried fruit on hand for a quick bite. A 1/2 cup of papaya has 5.5 grams of fiber and 5 rings of dried apples has almost 3 grams of fiber.
4. **Peels Are a Plus:** Get the most fiber from fruits and vegetables by leaving the peels on. If you're worried about dirt and pesticides, rinse your produce in warm water before eating. Remember, whole foods have more fiber than juices.
5. **Go Easy On Yourself:** When you or your parents are shopping, grab bags of ready-to-eat fresh vegetables, like baby carrots and salad mixes. And look for packaged, pre-sliced fruits (peels on).

# Fiber Activity

Besides helping move food through the digestive system, fiber also reduces the risk of heart disease and assists in maintaining normal blood sugar levels. So, it is important to make sure you help your body get the 20 – 40 grams of fiber it needs every day!

## ACTIVITY 1: GRAIN STATION

At the “Grain Station,” there is a variety of cereals that contain fiber. Read the food labels and determine which products qualify as a “good source” of fiber (Remember: 3 grams or more per serving).

Complete the chart below.

Cereals that qualify as a “good source” of fiber:

Name of Cereal	Grams of Fiber

## ACTIVITY 2: FUN TASTE TEST

Now taste four different kinds of cereal that are a “good source” of fiber.

Name of Cereal	Grams of Fiber	Did you like it?		
		Yes	or	No
		Yes	or	No
		Yes	or	No
		Yes	or	No
